This option is only displayed when a Transaction is locked. Here you can see which addresses are currently selected in the locked transaction. While the transaction is being edited you can also select addresses to be used by clicking on these check boxes (which is useful to select hidden addresses in a transaction).

The Account number has been included on the Search Accounts screen and this window may now also be translated into your local language.

When the email is sent, the user receives the Zinfonia message "The distributor has replied directly by email".

The Cancel button on the Zinfonia order screen now does not marked a previously handled transaction as unhandled.

New ATAXCOUNTRY Browse Column

For US users that have the direct tax update installed, you can now include a browse column called ATAX COUNTY which will display the tax county that is related to the displayed zip code. This is required for sorting tax reports.
